# Guideline 0105 (decommissioned)

# Blown-In and Loose-Fill Insulation from Ligno-Cellulose Fibres (decommissioned)

Version: Nov. 2, 2026
for the awardance of the eco-label

decommissioned

## Introduction

## This guideline was decommissioned on 1 July 2026 by a resolution of the Criteria Commission and the Executive Board.

Products certified in accordance with these requirements remain valid until the end of the licence period and must continue to comply with the requirements of this guideline.

The product group described here will in future be covered by Guideline 0107 "Blown-in Insulation Materials".

## 1 Application Areas

The requirements apply to blow-in and bulk insulation materials made from lignocellulosic fibres. They are to be applied exclusively to such products.

## 2 Award Criteria

## Information on the content and requirements of decommissioned guidelines:
